

## Pine wood swing h301\_12

Single swing in pressure-treated pine, dimensions 160x230x195 cm. Sturdy structure for private use in gardens, terraces and courtyards.

The h301\_12 swing represents a solid and safe play solution, designed for setting up play areas in residential outdoor contexts. Made of **pressure-treated pine**, the structure guarantees high resistance to atmospheric agents and a long operational life, making it ideal for installation in gardens, courtyards or large terraces. The single-station configuration optimizes the footprint without sacrificing the structural stability necessary for the fun of children.

## Technical features

- **Material:** Pine wood treated with autoclave impregnation
- **Configuration:** No. 1 single seat in high-resistance plastic material
- **Vertical posts:** 7x7 cm section for optimal stability
- **Upper crossbeam:** 9x9 cm section for dynamic load support
- **Installation:** Supplied in a complete assembly kit
- **Total dimensions:** L.160 x D.230 x H.195 cm
- **Compliance:** Product compliant with EN 71 standard
- **Intended use:** Exclusively for private/domestic use
