

Terracotta and metal planter for public spaces h140155

Planter for public spaces and urban furniture made of metal with a terracotta bowl. Made in Italy product.

Planter for public spaces ideal for enhancing squares, historic centers, streets, and avenues; designed to create **unique outdoor corners**. The presence of curves and lines starting from the supports makes it easy to place in **classic outdoor environments**. Special attention was paid to designing the three supports that hold the **terracotta bowl**. Arched-shaped supports in galvanized flat iron mm. 80 x 6, embellished with curved elements located in the upper part of the planter; furthermore, to provide greater stability without compromising its beauty, a circular stiffening element was added to each individual support. To complete it, the planter has an upper ring for supporting the terracotta bowl.

Circular structure composed of:

- no. 03 supports, arched-shaped, in galvanized flat iron mm. 80 x 6 with decorative elements at the top; each individual support is provided with a circular stiffening element
- **ring**, in the upper part, in galvanized steel round tube mm. ? 20 x 1.5
- **terracotta bowl**

Anti-corrosion treatments and finish

- **Pre-treatment:** before being painted, the product is pre-treated by spray washing with special degreasing liquids. After washing, the product to be painted is dried for 15 minutes in a drying oven.
- **Anti-corrosion treatment:** in order to provide suitable protection against atmospheric agents, the product is subjected to a first painting cycle using a thermosetting anti-corrosive powder primer based on epoxy resins with special pigments.
- **First curing:** the product treated with the anti-corrosive primer is subjected to a first oven curing lasting 15 minutes at a temperature of 180°. In this phase, the anti-corrosive polymerizes, forming a coating thickness of approximately 60 microns.
- **Painting:** the product is subjected to a final painting cycle with thermosetting powder based on polyester resins in “**gunmetal**” color. The painting is performed with electrostatic spray equipment, which allows the powder to settle uniformly on the pieces, forming a minimum thickness of 60 microns.
- **Final curing:** the painted product is subjected to a final oven curing lasting 20 minutes at a temperature of 160°.

Fixing:

- the supports are equipped with holes for anchoring to the ground using anchor bolts and expansion plugs.

Dimensions:

- top diameter 84 cm
- base diameter 103 cm
- height total 70.5 cm
- total weight 65.5 Kg

- Height in millimeters 705.000000
- Planter material metallo, terracotta
- Diameter 1030.000000
- shape round
- Height 66 cm
- Width 103 cm
- Depth 103 cm
