

## Planter for public spaces stone effect grey h319\_157

Planter in stone effect grey concrete and Okoumé wood. Dimensions: W 170 x D 125 x H 90 cm. Weight: 350 kg.

The **planter with bench H319\_157 for public spaces** is an urban furniture element that combines **natural materials and construction technology**, offering a resistant, elegant solution that complies with environmental regulations. Thanks to its **modern and functional design**, it integrates perfectly into public contexts such as squares, green areas, schools, pedestrian paths and urban car parks.

Made of **stone effect grey concrete**, this planter boasts a sober aesthetic and a **high-resistance** structure, capable of withstanding mechanical and environmental stresses even in adverse weather conditions. The stone effect surface treatment gives it a textured, natural and long-lasting appearance.

A distinctive feature of the H319\_157 is the presence of the **exotic Okoumé wood bench**, processed and treated with **anti-decay** products, which further enhances the visual appearance of the product and introduces a **harmonious contrast between concrete and wood**. A design detail that expresses **craftsmanship quality** and attention to materials.

To ensure maximum safety in public spaces, the planter is equipped with **rounded and sanded corners**, to avoid sharp edges and accidental impacts. With its **significant dimensions (170 x 125 cm)** and a low height of 90 cm, it can accommodate **medium and large green compositions**. The **weight of 350 kg** ensures stability without the need for ground fixings.

Finally, the product is **CAM certified** (Minimum Environmental Criteria), making it suitable for public projects and tenders requiring low environmental impact materials.

Choose the **planter with bench H319\_157** to enrich your public spaces with a resistant, safe and sustainable element. Contact us for personalized quotes and large-scale supplies.
