

Planter for urban furniture 150 L h1003_17

Planter for urban furniture 150 L with a rounded profile in painted steel. Dimensions: W 70 x D 55 x H 53 cm.

The **H1003_17 planter** is designed to offer a **modular and functional solution** for furnishing urban, public, or private spaces. Its **essential design** and **slightly rounded profile** make it perfect for **modular installations**, ideal for delimiting paths, creating green borders, separating functional areas, or simply beautifying contemporary architectural contexts.

Made of **galvanized and thermosetting polyester powder-coated steel**, this planter is resistant to atmospheric agents and ensures **durability and protection from corrosion**, making it suitable for continuous outdoor use. The **compact shape** allows for easy placement even in small spaces, without giving up a generous capacity of **150 liters**, ideal for ornamental plants, shrubs, or small floral compositions.

The interior is prepared for the **insertion of an inner pot** (not included), an element that simplifies maintenance, plant replacement, and drainage management. The **self-standing fixing** allows for immediate installation, without the need for anchoring, and is easily repositionable according to design needs.

Shape your urban spaces with modular style and durability. Order the **H1003_17 planter** now or contact us for custom solutions.
