

Plastic barrier h940_05

Plastic pedestrian barrier, durable and safe, with CE marking and customizable space for screen printing. Dimensions: 200 x 100 cm.

The **plastic barrier h940_05** is a leading fence on the European and Italian market, designed to guarantee safety, practicality, and durability in every situation. Made entirely of **injection-molded polypropylene**, this pedestrian barrier offers an unparalleled solution for the delimitation of urban areas, construction sites, or public events.

Built in a **single piece without screws or moving parts**, it is free of sharp or pointed elements, making it ideal for high-traffic environments, ensuring maximum safety for pedestrians and operators. Thanks to its robustness and ability to withstand weather conditions, this barrier is suitable for both temporary and permanent use.

Certified according to **CE, ANSI A10-18 1993, and UNE 222456** standards, the barrier complies with safety and quality regulations. It is also **available in different colors** and equipped with a **30 x 30 cm customizable space** for screen printing (upon request and subject to a quote, the barrier can be customized with the logo via screen printing), logos, or messages, making it perfect for public bodies, law enforcement, or private companies.

Choose the **plastic barrier h940_05** for your next delimitation: resistant, certified, and customizable. Order today to ensure safety and practicality in every situation!

Technical features:

- **Material:** Injection-molded polypropylene
- **Construction:** A single piece without screws or moving parts
- **Certifications:** CE, ANSI A10-18 1993, UNE 222456
