

Plastic cleaning trolley h505_13

Professional trolley made of SCS-certified recycled plastic with a double 16L bucket and universal press. Robust, compact, and impact-resistant.

The **h505_13** professional cleaning trolley is a high-performance washing unit designed to ensure hygiene and sustainability in intensive operational contexts. The structure is made of **Structofoam**, a polymer with high mechanical resistance that ensures long-term durability and total inertia to chemical agents. The integration of **ReFlo** technology allows the use of premium quality recycled plastic for over 50% of the composition, certified according to **SCS** standards.

The washing system is based on the clear separation between clean and dirty water thanks to the **two independent 16-liter buckets**, optimizing detergent consumption and improving the quality of sanitization. Manoeuvrability is guaranteed by four non-marking swivelling wheels and an ergonomic handle that facilitates movement in corridors and narrow spaces.

Technical specifications

- **Type:** Double bucket floor washing trolley
- **Capacity:** 2 buckets of 16 liters each
- **Wringing system:** Universal vertical press with a 2-year warranty
- **Frame material:** Structofoam (high-resistance copolymer)
- **Sustainability:** SCS-certified ReFlo recycled plastic (?50%)
- **Wheels:** 4 swivelling units Ø 75 mm
- **Dimensions:** 700 x 400 x 1030 mm
- **Operating weight:** 9.11 kg
- **Compatibility:** Can be used with all types of mop and mocio
