

Plastic construction barrier h668_03

Plastic delimitation barrier. Dimensions: W200 x H102 cm.

Road barrier ideal for use in construction sites or to allow correct management of queues and crowds at fairs, events, concerts, demonstrations. Also perfect for indoor use. Made of **recyclable polyethylene**, particularly **resistant to impacts and atmospheric agents**. **Easy to move and transport** thanks to its lightness and the presence of ergonomic handles. Equipped with **swivel feet** that make it stackable and space-saving.

Technical features:

- Dimensions: W200 x H102 cm
- Plastic material
- Stackable
- With swivel feet
- Prepared for reflective panel insertion (panel not included)

**Images purely indicative (signage panel and warning light not included)*

INFORMATION

- **Material** plastica
- **Length in millimetres** 2000.000000
- **Height in millimetres** 1020.000000
