

Plastic tray for restaurants h464_414

Rectangular polypropylene tray with non-slip surface. Dimensions: W 45.7 x D 35.6 cm.

The **H464_414 plastic tray** is an essential accessory for service in **restaurants, canteens and snack bars**, designed to ensure **durability, functionality and safety**. Made of **one-piece polypropylene**, it features a **non-slip surface** that keeps plates, glasses and cutlery stable during transport, reducing the risk of accidental drops.

The dimensions **45.7 x 35.6 cm** make it **ideal for serving multiple courses** simultaneously, optimizing staff time and movements. The **non-porous and seamless construction** prevents the accumulation of dirt and bacteria, making it **easy to clean** and suitable for frequent use in professional environments.

The tray is **virtually indestructible**, it does not flake or warp, even after prolonged use. However, **it is not dishwasher safe**: hand washing is recommended to preserve its characteristics.

Rely on the practicality and durability of the **H464_414 tray**: buy it now for your restaurant or request a dedicated offer for bulk supplies!

Technical features:
