

Plate rack trolley for restaurant dining rooms h43117

Stainless steel plate rack trolley with removable divider grids, 40 kg capacity, for catering and restaurants.

The **plate rack trolley** is a solution dedicated to the transport, collection, distribution, and storage of tableware in professional environments. Designed for restaurants, self-service, diners, hotels, canteens, and catering services, it guarantees efficient and organized handling of catering equipment.

Made of **stainless steel**, the trolley ensures robustness and **durability over time**, resisting humidity and high-frequency use environments. The **removable divider grids** allow for flexible configurations based on loading and storage needs.

Technical characteristics

- Plate trolley
- Material: stainless steel
- Removable divider grids
- Total capacity: 40 kg
- Dimensions: W980 × D515 × H830 mm
