

Plate transport trolley for restaurants h2200102

AISI 304 stainless steel plate trolley with two shelves and inclined anti-tip base, four swivel wheels and optional separation grids. Ideal for catering and food service.

The plate trolley is designed for the **transport, collection, distribution, and storage of dishes** in professional contexts such as restaurants, snack bars, hotel dining rooms, canteens, and catering services. Robust and modular structure that allows for efficient organization of the flow of dirty and clean dishes throughout the service chain.

Technical characteristics

- **Material:** AISI 304 stainless steel (walls, shelves, and supporting structure)
- **Structure:** AISI 304 square stainless steel tube 2×2 cm
- **Configuration:** 2 shelves
- **Support base:** Inclined anti-tip for greater load stability
- **Mobility:** 4 swivel rubber wheels, diameter 12.5 cm (2 equipped with brakes)
- **Dimensions:** 90 cm (width) × 60 cm (depth) × 102 cm (height)

Optional

- **Two separation grids:** Removable in AISI 304 stainless steel, allowing further subdivisions of the trolley to organize different categories of dishes
