

Play composition with slide for children h735_21

Modular play system with large slide, ladder, cubes and tunnel. Dimensions: W 250 x D 400 x H 140 cm.

The **play composition h735_21** is an innovative modular system designed for Outdoor Education and the setup of safe and stimulating play areas. Made of **high-quality polypropylene**, this set solves the need for durable and versatile children's furniture, allowing for the configuration of cubes, playhouses, and adventurous paths. Thanks to the **UNI EN 1176** certification, the play set meets the highest European safety standards for use in public places. The structure is composed of lightweight yet robust elements, including a **large slide** and a tunnel, designed to promote motor development and socialization. The non-toxic and UV-resistant material guarantees exceptional durability in both indoor and outdoor environments, keeping the bright colors unchanged over time despite exposure to atmospheric agents.

Technical features

- **Certification:** Compliant with UNI EN 1176 1/3 (playground safety)
- **Material:** Non-toxic and UV-resistant Polypropylene plastic
- **Play area size:** 2.5 x 4 meters
- **Set components:** 9 panels, 2 ladder panels, 1 large slide, 1 large ladder, 1 tunnel, 2 balustrades
- **Available colors:** Red, fuchsia, orange, yellow, light green, blue
- **Environment of use:** Indoor and Outdoor
