## Playground slide h350\_319

Professional electro-galvanized steel slide compliant with EN 1176 standards. Height 150 cm, track 275 cm. UV and weather resistant.

Professional slide designed for installation in playgrounds, play centers, and public or private green spaces, developed in full compliance with **European Standards EN 1176**. The structure is conceived to offer maximum safety and durability in high-frequency use contexts, solving issues related to mechanical wear and deterioration due to atmospheric agents.

## Technical features

- **Structure material:** Electro-galvanized and painted round steel tube.
- **Composition:** Two-element system (ladder and slide).
- **Ladder specifications:** 50 mm diameter tubular with 30 mm diameter handrail.
- **Step safety:** Non-slip PVC coating.
- **Track dimensions:** Length 275 cm.
- **Fall height:** 150 cm.
- **Overall dimensions:** 225 x 74 x 226h cm.
- **Impact area:** 24 m<sup>2</sup>.
- **Minimum space required:** 625 x 375 cm.
- **Hardware:** Class 8.8 galvanized steel with self-locking nuts and colored nylon nut covers.
- **Surface treatment:** Oven painting at 180°C with high UV resistance polyester powders.
- **Age range:** 3-12 years.
- **Capacity:** Suitable for 2 simultaneous users.
- **Installation time:** Estimated assembly in 1 hour.
