Playground swing h35109

Professional aluminum swing h35109 with double seat (flat and cradle). Durable structure for playgrounds and EN1176 certification.

The double-seat swing **h35109** is a professional play solution designed to ensure fun and safety in public and collective contexts. The structure stands out for the use of **painted aluminum** posts, a material chosen for its excellent ratio between structural lightness and mechanical resistance. Thanks to specific outdoor treatments, the product maintains its performance characteristics even when exposed to aggressive atmospheric agents. The mixed configuration with **cradle seat and flat seat** allows simultaneous use by children with different motor skills and age groups, optimizing space in the play area.

Technical features

- Dimensions: L 148.1 x D 327.5 x H 225 cm
- Supporting material: painted aluminum profiles for outdoors
- Seat types: 1 cradle seat (for the little ones) and 1 flat seat
