

## Playground tower h575\_148

Multi-play composition for parks equipped with 4 towers, with rope passages and tunnels. Dimensions: 400 x 539 x H. 264 cm.

The **playground tower** is designed to meet the needs of kindergarten children. With a design inspired by the shape of a pumpkin, this charming structure is completed by cute smiling balustrades that stimulate the imagination of the little ones. The product is composed of **four towers**, each with **platforms** at two **different heights** (58 cm and 90 cm), connected via **rope passages** and tunnels. Made with sturdy 90 x 90 mm **aluminum poles**, with **rounded corners** to ensure maximum safety. The tower is equipped with a **roof**, **HDPE balustrades** (15 mm thickness) and **MDPE platforms** with an embossed surface, for optimal safety against slipping. In addition, the tower offers an **MDPE climbing platform** with polyethylene stones and two **fun slides**: a **straight steel one** (height 58 cm) and one in **rotational polyethylene** (height 90 cm), for limitless fun.

### Technical features:

- Dimensions: 400 x 539 x H. 264 cm
- Material: aluminum
- With 4 towers
- Rope passages and tunnels
- Age: 2 - 8 years
- Safety area: 700 x 939 cm
- Max. drop height: 90 cm
- Safety surfacing: 50.2 sq m
- Recommended safety surfacing: 50.2 sq m
- Max number of users: 3 +
