

## Playground tower h575\_150

Playground tower with two straight rotational-moulded polyethylene slides (h. 120 cm and h. 150 cm). Dimensions: 497 x 804 x h. 337 cm.

This **multi-play composition** for **parks** is designed to offer a wide range of play opportunities, particularly suitable for the most adventurous children. The decorations depicting giraffes and elephants evoke a savannah atmosphere, stimulating the creativity of little ones. The product consists of **three towers** equipped with platforms at **three different heights** (90, 120 and 150 cm), connected via **net passages** both horizontal and vertical. To further enrich the play experience, **educational panels** have been integrated, such as Flower, which teaches color names in two languages, and Suntime, for learning to read **the clock**. The structure is made of **aluminum posts** measuring 90 x 90 mm, with rounded corners, and is equipped with **roofs and balustrades** in HDPE sandwich and **MDPE platforms** with a non-slip surface. The tower includes a **powder-coated steel rung ladder** and **two straight rotational-moulded polyethylene slides** (heights of 120 and 150 cm).

### Technical characteristics:

- Dimensions: 497 x 804 x h. 337 cm
- MDPE platforms
- 3 towers
- Net made of ropes
- Steel ladder
- Rotational-moulded polyethylene slides
- HDPE roof
- Age of use: 3-12 years
- Safety area: 798 x 1214 cm
- Max fall height: 233 cm
- Safety surfacing: 71.5 sqm
- Max number of users: 3 +
