

Polyethylene patient transfer roll h664_06

Polyethylene and nylon transfer roll for patients with mobility difficulties. Max load: 200 kg. Dimensions: 95 x 50 cm.

The transfer board for the disabled is a high-quality product suitable not only for **medical-healthcare facilities** but also for those caring for people with severe disability problems who cannot move independently from one surface to another. **The transfer sheet** features a solid **structure resistant up to 200 kg** and made of **polyethylene with a nylon cover**. The roll is lightweight at the same time, plus it is extremely easy to clean and disinfect. It is possible to receive the product in both the **foldable** and **non-foldable** versions.

Technical features:

- Material: polyethylene and nylon
- Easy to clean and disinfect
- Radiolucent
- No sharp edges or corners
- Resistant up to 200 kg
- Dimensions: 95 x 50 cm
- Available in the following variants: foldable and non-foldable
