

Polyethylene service trolley h464_405

Folding 3-shelf trolley in anti-corrosion polypropylene, 64.5x40.5x83.5 cm. Lightweight, space-saving structure ready for use in Horeca and healthcare.

The **H464_405 folding trolley** is a professional logistical tool designed to optimize internal transport in high-turnover contexts such as accommodation facilities, nursing homes, healthcare environments, and schools. The structure, entirely made of **polypropylene (PP)**, guarantees exceptional resistance to corrosion and chemical agents, making it ideal for moving detergents, tableware, or medical supplies in total hygienic safety.

The design stands out for its extreme versatility: the folding function allows the footprint to be reduced to a minimum when the trolley is not operational, solving storage problems in small closets or narrow service areas. Thanks to the **silent swivel wheels**, the h464_405 trolley ensures smooth mobility even when fully loaded, maintaining structural stability that prevents accidental tipping of the transported objects.

Technical features

- **Material:** High-quality polypropylene (PP), resistant to rust and acids.
- **Open dimensions:** W 64.5 x D 40.5 x H 83.5 cm.
- **Configuration:** 3 large and stable shelves.
- **Load capacity:** Up to 40 kg distributed.
- **Mobility:** 4 swivel wheels, 2 of which are equipped with a parking brake.
- **Operating weight:** 7.2 kg for maximum maneuverability.
- **Storage:** Quick-closing system with safety lock.
- **Assembly:** Supplied fully assembled and ready to use.
