

Polyethylene spring rider h351_19

Spring rider for playgrounds made of polyethylene. Dimensions: L.111.50 x D.80 Ø x H.121 cm. Weight: 67.80 kg.

The cute spring rider is one of the ideal components for furnishing playgrounds and public areas where you want to offer the little ones the chance to have fun and play. **The ride is suitable for children from 0 to 12 years old and built to ensure extreme safety and comfort; the product is indeed manufactured in accordance with the EN1176-1-2017 standard.** The ride features a silhouette made entirely of **PE-HD polyethylene with a mass-colored rotational system**, high density and fully recyclable. **The spring assembly with 20 mm wire is tested and certified and is anchored at the ends via the spring disk system.** The 5 mm thick iron U-bracket ensures perfect union and seal between the spring assembly and the ride silhouette. **The ground fixing support** is provided by a robust steel frame that is subsequently hot-dip galvanized.

Technical features:

- Polyethylene
