

Polyethylene tank h893_03

Water tank made of high-quality polyethylene. Dimensions: L. 70 x D. 70 x H. 169.5 cm. Capacity: 690 liters.

The **plastic tank** is made of high-quality **polyethylene** (HD-PE), representing an ideal solution for the **non-pressurized storage** of various types of liquids, including drinking water. This tank is equipped with a specific DN 540 **cleaning outlet** located on the top, and offers two bottom outlets sized S 56 x 4, thus facilitating connection and distribution operations of the stored liquid. It is important to emphasize that the **HD-PE** material used in the construction of the tank is **physiologically safe** and meets **regulations** related to domestic installations, as well as recommendations for use relating to drinking water.

Technical features:

- Dimensions: L. 70 x D. 70 x H. 169.5 cm
- Capacity: 690 liters
- Material: high-density polyethylene (HD-PE)
- Water tank
- With DN 540 outlet
- Complies with guidelines for domestic installations and drinking water recommendations
- Color: blue
- Weight: approx. 23 kg

Optional:

- DN 50/2" shut-off valve

**Image purely indicative*

**Upon request and subject to quotation, a connection pipe can be requested*

INFORMATION

- **Material** polietilene
