

Polypropylene cleaning trolley h422_90

Professional polypropylene trolley with double 15L bucket, plate wringer and broom holder kit. Compact dimensions, CAM compliant.

The **h422_90** professional cleaning trolley is an advanced technical solution designed to meet hygiene requirements in high-traffic environments such as companies, hospitals, and nursing homes. The supporting structure in **polypropylene copolymer** ensures high resistance to impacts and chemicals, while maintaining a lightness that promotes maneuverability. Thanks to the stackable frame and ergonomic handle, the trolley optimizes transport and storage operations, solving issues related to the management of tight spaces in service warehouses.

Technical features

- Material: high-density polypropylene copolymer
- Configuration: stackable frame for logistical optimization
- Capacity: two 15-liter buckets for the separation of detergent solutions
- Accessories: integrated storage box and professional broom holder kit
- Wringing system: high-efficiency plate wringer
- Dimensions: W. 53 x D. 65 x H. 87 cm
- Safety: completely latex-free product
- Sustainability: compliant with Minimum Environmental Criteria (CAM) for public procurement
