

Polypropylene office task chair h122_92

Black polypropylene office task chair with fixed armrests. Adjustable height: 98-108 cm.

The polypropylene task chair has been specifically designed to furnish offices and workstations that require sitting for several hours. **The comfortable black polypropylene structure guarantees a correct position, preventing back and neck problems.** The product also features the possibility of **adjusting the height from 98 to 108 cm** and is equipped with a tension adjustment knob for body weight. The chair seat is upholstered in black padded fabric, while the adjustable backrest is in black breathable technical mesh with lockable permanent contact. The flexible black lumbar support ensures comfort and correct posture. The chair is finally equipped with fixed black polypropylene armrests.
