

Polyurethane anti-decubitus mattress h937_07

Single-section expanded polyurethane anti-decubitus mattress, 195x85x14 cm, reversible with ovoid processing for pressure sore prevention.

This **anti-decubitus mattress** is designed specifically for the prevention of pressure injuries in patients confined to long-term bed rest. The structure is made entirely of high-quality **expanded polyurethane**, characterized by a **single-section ovoid processing** that promotes proper load distribution. The symmetrical design makes the product extremely versatile, allowing its use on both sides to optimize the lifecycle of the support and maintain constant elastic performance.

Technical features

- **Dimensions:** W. 195 x D. 85 x H. 14 cm
- **Structure:** Single-section ovoid processing
- **Material:** High resilience expanded polyurethane
- **Reversibility:** Usable on both sides
- **Max capacity:** 150 kg
