Removable bike rack with semicircular wheel holders h19113

Removable bike rack with concrete supports and galvanized steel structure. Available with 2, 3, 4 or 5 bike spaces.

The **removable bike rack with semicircular wheel holders** is a robust and self-standing solution designed for creating safe parking areas in high-traffic urban contexts. Featuring a hybrid structure that combines the mechanical strength of **galvanized steel** with the gravitational stability of **cement conglomerate**, this product solves the problem of permanent fixing to the ground, offering a stationary position by mass but repositionable according to logistical needs. The target audience includes public administrations, educational institutions, and commercial area managers who require long-lasting infrastructure against atmospheric agents and mechanical wear.

Technical characteristics

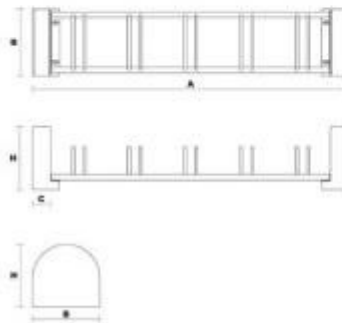

- **Dimensions:** variants of mm 1060, 1460, 1860, 2260 (L) x 480 (D) x 450 (h)
- **Capacity:** available in versions with 2, 3, 4 and 5 bike spaces
- **Structure material:** frame in galvanized and powder-coated square steel tubes
- **Metal color:** Standard Micaceous Gray
- **Side supports:** high-strength cement conglomerate (R42.5) with internal steel reinforcement
- **Concrete finish:** marble grit available in Carrara White, Occhialino or Verona Red
- **Installation method:** removable (self-standing due to its own weight)
- **Operating weight:** 125, 132, 137, 139 Kg based on the chosen configuration
- **Supply condition:** the item is delivered fully assembled

* Image purely indicative (the structure color is Micaceous Gray)

INFORMATION

- **Material** Steel
- **strengths** amovibili con base in cemento, bi-facciali
- **Typology** al suolo
- **fixing** removable
- **Color** grigio micaceo
