Removable double-sided bicycle rack h19111

Removable double-sided bike rack in micaceous grey with concrete side supports. Available with 10, 12 and 14 bike spaces. Min dim. 2600x750x400h mm.

The **removable double-sided bicycle rack h19111** represents a robust and functional solution for organizing cycling parking areas in urban and high-traffic contexts. Designed to meet the needs of **municipalities, schools, stations, and public parks**, this system solves the problem of disordered parking without requiring invasive structural interventions. Thanks to the **high-resistance cement conglomerate side supports**, the structure guarantees such intrinsic stability that ground anchoring is not necessary, facilitating positioning and eventual relocation according to logistical needs.

The **double-sided** configuration optimizes available space, allowing access from both sides, while the **galvanized and powder-coated steel** rack ensures long-lasting protection against corrosion and atmospheric agents. The material contrast between the micaceous grey finish of the steel and the different chromatic variants of the marble grit of the supports offers a sober and professional aesthetic impact, suitable for any urban furniture.

Technical characteristics

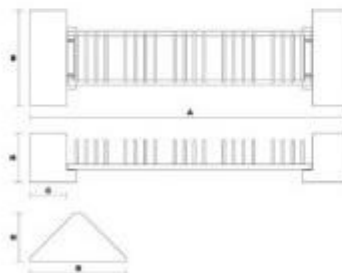

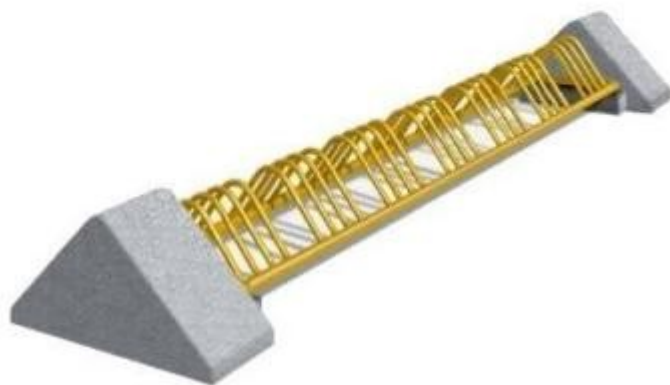

- **Dimensions:** Variable length (2600, 3000 or 3400 mm) x Depth 750 mm x Height 400 mm
- **Capacity:** Available in 10, 12 or 14 bike space versions
- **Rack structure:** Galvanized steel with powder coating
- **Steel finish:** Micaceous Grey
- **Side supports:** High-resistance cement conglomerate (R42.5) with internal steel reinforcement
- **Support material:** Mixture with marble grit (Carrara White, Occhialino or Verona Red finishes)
- **Support thickness:** 300 mm
- **Total weight:** 187 kg (10 spaces), 192 kg (12 spaces) or 198 kg (14 spaces)
- **Fixing type:** Removable (stable by gravity)
- **Installation:** Supplied with rack to be assembled and fixed with the provided hardware to the side elements.

* Image purely indicative (the structure color is micaceous grey)

INFORMATION

- **Material** Steel
- **strengths** amovibili con base in cemento, bi-facciali
- **Typology** al suolo
- **fixing** removable
- **Color** grigio micaceo
