

Portable aluminum medical couch with adjustable height h904_37

Professional medical couch h904_37 in aluminum, adjustable height 68-84 cm, lightweight (14 kg) and portable for medical practices and physiotherapy.

The **h904_37 couch** represents an advanced technical solution for professionals requiring versatile medical support, combining **structural robustness** with the need for easy portability. Designed with an **aluminum load-bearing structure**, this model meets the operational needs of medical practices, specialist clinics, and physiotherapy or massage therapy centers requiring a dynamic workstation.

Ergonomics are guaranteed by **manual height adjustment**, allowing the work surface to be set between 68 and 84 cm, optimizing the operator's posture during treatments. Patient comfort is ensured by 3 cm **high-density foam** padding, covered in **technical synthetic leather** resistant to liquids and professional sanitizing detergents. The configuration includes a headrest and an articulated support to facilitate specific positioning during therapeutic maneuvers.
