

Portable emergency spill kit h1045_05

Large spill kit for hydrocarbons and derivatives (water-repellent) with wheeled storage chest with lid, dimensions 120x80x100h cm.

The **portable emergency spill kit** (model h1045_05) is a monumental industrial system on wheels, designed for prompt intervention and rapid neutralization of massive spills of hydrocarbons and derivatives. Developed for **large industrial complexes, manufacturing plants, logistics hubs, fuel storage areas, and high-risk technical departments**, this kit fully complies with legal requirements regarding the management of potentially polluting and dangerous liquid substances, in accordance with environmental regulations (Legislative Decree 152 of 03.04.06 and subsequent amendments and additions with Legislative Decree 4 of 16.01.08), ISO 14000 procedures, ADR and Ministerial Decree 20/2011. The system solves the operational problem of **timely containment and remediation of massive oil spills even in the presence of water or outdoors in the rain**, as the absorbent materials contained are oleophilic and completely hydrophobic (retaining hydrocarbons but not water), in full compliance with European standards. The entire equipment is housed inside a gray, easy-to-maneuver wheeled storage chest with a lid, configured to be brought quickly and easily to the accident site.

Technical features

- **Intended use:** absorption of hydrocarbons and derivatives in outdoor environments (in the rain), on water surfaces or near water-based processes
- **Properties of absorbent materials:** oil-only line, essential for retaining oils but not water; compliant with European standards
- **Outer container type:** easy-to-maneuver storage chest with lid and wheels, gray color
- **External dimensions of the chest:** cm. 120 x 80 x 100h
- **Function of pads and rolls:** allow for rapid absorption of liquid substances with extreme ease and practicality, suitable for emergency cleaning and for collecting large quantities
- **Function of socks and booms:** allow to easily circumscribe a spill, containing and simultaneously absorbing polluting liquids to avoid contaminating surrounding areas
- **Function of pillows:** usable in cramped spaces, to be used under taps, machinery, leaking pipes, or as a preventive base for transfers
- **Function of flakes:** allow to collect pollutants in the most difficult to reach points
- **Function of granular absorbent:** universal anti-slip granular absorbent for rapid, perfect and complete cleaning of surfaces, compliant with EU CEN TS 15366 and Fr NF P 98-190 standards
- **Reference regulations:** Legislative Decree 152 of 03.04.06 and subsequent amendments and additions with Legislative Decree 4 of 16.01.08, ISO 14000 procedures, ADR, Ministerial Decree 20/2011

Composition and detailed kit equipment

- **Container:** 1 storage chest with lid and wheels (cm. 120x80x100h)
- **Granular absorbent:** 10 kg of universal anti-slip absorbent granules in a bag
- **Absorbent pads:** 300 pads (cm. 50x40) single thickness, white color
- **Absorbent rolls:** 1 roll (cm. 40 x m 80) single thickness, white color
- **Absorbent socks:** 5 socks (Ø 8 x 240 cm), white color
- **Absorbent booms:** 2 booms (Ø 13 x 300 cm), white color
- **Absorbent pillows:** 5 pillows (cm. 40x40), white color

- **Absorbent flakes:** 1 kg of absorbent flakes, white color
- **Protection devices and P.P.E.:**
 - 4 disposable coveralls
 - 4 masks
 - 4 pairs of safety goggles
 - 4 pairs of disposable nitrile gloves
- **Collection and cleaning materials:** 10 black PLT bags (cm. 40+16 gusset x 110 h) for waste collection
- **Included documentation:**
 - 1 instruction sheet
 - 1 incident recording form with kit equipment / material consumption sheet
