

Portable LED lamp with rechargeable battery h1019_08

Rechargeable LED lamp in plastic and metal, 400 lumens, folding head with 3 magnets and hook. Ideal for technical inspections and workshop use.

The **H1019_08 rechargeable portable LED lamp** is a professional tool designed to guarantee optimal lighting and **total freedom of movement** during maintenance operations. Thanks to its compact structure and folding head, it allows for easy operation even in the tightest spaces, solving the problem of poor visibility in engine compartments or electrical panels.

Technical specifications

- **Type:** Rechargeable portable LED lamp
- **Light output:** Triple source (main 400 lm, rear 200 lm, front spot 100 lm)
- **Source power:** 3W main light, 1.5W rear light, 1W front spot
- **Power supply:** Integrated 3.7V / 0.8 Ah lithium-ion battery
- **Battery life:** Approximately 3 hours of continuous operation
- **Charging system:** USB-C interface (charging time approx. 2.5 h)
- **Color temperature:** 6500K (cold light for high precision)
- **Fixing:** 3 integrated magnets, rear clip, and adjustable hook
- **Mechanical resistance:** IK07 rating (impact resistance)
- **Protection degree:** IP20 (indoor use)
- **Weight and dimensions:** 100 g; 16 x 3.7 x 2 cm

Accessories included: 60 cm USB-A/USB-C connection cable.
