Portable toilet with drop chemical toilet h606_03

Portable toilet with seated chemical toilet without bowl, with storage and without rinsing.

Portable toilet with **drop chemical toilet** seated **without bowl** with accumulation and without rinsing. **Wastewater** is channeled into the storage tank. Upon request, it is possible to install a manually operated recirculation kit, which allows the bowl to be washed with wastewater properly treated with a decomposing agent. The toilet has a unique feature: it does not have a so-called **splash guard.** The waste container also serves as a container for the rinsing water. **Portable chemical toilets** made of polyethylene with a self-supporting structure. Equipped with a large vent pipe to avoid the stagnation of bad odors, polyethylene hinges to better withstand the elements, a latch with a key and vacant/occupied indicator, and lifting eyelets to allow for transport in maximum safety. Multiple ventilation windows and a suitably raised base to facilitate loading and unloading operations. **Chemical toilet material**: External box, translucent roof, platform, and toilet waste tank in LLDPE, UV-stabilized, produced with rotational molding technology. **100% recyclable.**

Technical Features:

- Drop chemical toilet
- Dimensions: L.1100xP.1100xh.2450 mm
- Door opening: 600x2000 mm
- Weight: 95 Kg
- Waste storage volume: 170 Lt
- Approx. 200 uses
- Recyclable: 100%

INFORMATION

- **Typology** WC
