Portable toilet with Recirculating Chemical WC h606_02

Portable toilet chemical WC **with recirculation** equipped with non-slip flooring**.** Available in various colors.

Chemical **WC** with **recirculation** equipped with a large vent pipe to prevent the stagnation of bad odors, latch with key with vacant/occupied signaling and side and rear handles to facilitate movement. Multiple ventilation windows and an appropriately raised base for handling with forks and recesses for transport with a trolley.

The portable toilet works through the collection of wastewater, conveyed into the storage tank and appropriately treated with the **disintegrating agent**, which are reused for rinsing the bowl thanks to the **foot-operated** diaphragm pump.

The chemical toilet is made of an external box, translucent roof, platform and toilet wastewater tank in **LLDPE**, **anti-UV** stabilized, produced with rotational molding technology. **100% recyclable.**

Technical Features:

- Recirculating chemical WC
- Dimensions: W.1100xD.1200xH.2450 mm
- Door opening: 600x2000 mm
- Weight: approx. 97 Kg
- Waste storage volume: 170 Lt
- Approx. 200 uses
- Recyclable: 100%
- Available in various colors.
- Reference standard: UNI EN 16194

Upon request and subject to quote, the following options can be requested: hand sanitizer gel dispenser, washbasin, urinal, lifting eye bolts and transport trolley.
