

Portable wooden examination table adjustable height h904_39

Portable examination bed in natural wood, adjustable height 40-58 cm. Lightweight 12 kg structure with breathing hole and 135 kg load capacity.

The **h904_39 examination bed** is a professional support designed for healthcare, physiotherapy and outpatient settings that require maximum operational flexibility. The **wood structure with a natural finish** meets the need for technical furniture that maintains a refined aesthetic, while ensuring high structural resistance. Thanks to the **manual height adjustment** system, the work surface can be set between 40 and 58 cm, allowing the operator to adapt the setting based on the type of treatment or the patient's access needs.

This model was developed to solve critical issues related to transport: with a **weight of only 12 kg** and a portable configuration, it facilitates movement between different clinical environments or for home use. The support surface is equipped with **3 cm foam padding** and a sanitizable eco-leather upholstery, integrating an **oval breathing hole** to optimize patient comfort during sessions in the prone position.
