

Portable workbench h858_68

Galvanized steel portable workbench, adjustable in height and tilt. Folding structure with 100kg capacity for workshops and construction sites.

The **portable workbench h858_68** is designed to meet the needs for mobility and stability in the **industrial, craft, and maintenance** sectors. Thanks to its versatile structure, it serves as an ergonomic workstation and integrated clamping system, solving the problem of operational precision in temporary contexts such as construction sites or mobile workshops.

The **galvanized and powder-coated steel** structure ensures high resistance to corrosion and mechanical stress. The operator can fully customize the setup thanks to the **tilting top up to 80°** and the telescopic height adjustment, reducing postural fatigue during prolonged sessions.

Technical specifications

- **Frame material:** Steel with galvanized finish and powder coating
- **Height adjustment:** Telescopic from 77 to 107 cm
- **Tilt angle:** Adjustable from 0° to 80°
- **Work surface:** Extendable via cranks from 30 to 48.5 cm
- **Clamping capacity:** Jaw opening from 22.5 to 41 cm
- **Maximum capacity:** 100 kg
- **Dimensions when closed:** 60.5 x 24.5 x 93.5 cm
- **Operating weight:** 12.3 kg
- **Extra equipment:** Quick opening mechanism and sliding locking system
