

Beech wood step stool for medical clinic h582_24

Beech wood step stool with 1 step, 40x27x25 cm, water-based painting. For clinics and medical offices.

The **beech wood step stool** is an essential accessory in clinics and medical offices to facilitate patient access to **examination tables**. Thanks to its stable structure and simple design, it allows for comfortable and safe climbing, reducing the patient's physical effort and preventing situations of discomfort or tripping when accessing the clinical seat.

The **water-based painting** guarantees an ecological and safe product for healthcare environments, also facilitating daily cleaning and disinfection of the surface.
