

Preschool chair in beech h553_04

Preschool chairs with beech seat. Aluminum structure color. Size 2

Structure composed of three **tubular steel elements** of 25x1.5 mm shaped to allow **stackability**. Under the seat are two flat iron crossbars of 20x3 mm to make the structure more resistant. The entire shaping of the individual components of the metal structure is cold-formed to guarantee maximum resistance and the total absence of “wrinkles”; while the fastening of one component to another occurs via continuous wire welding, ensuring maximum hold and the absence of imperfections, thus leaving the structure free of defects that could cause harm to people or property. **Painting** is carried out through the application of epoxy powders, after degreasing and phosphating treatment, and subsequent polymerization in a thermal tunnel at 200°. The **seat and backrest** are made of 7 mm beech plywood, press-curved and hot-shaped with an ergonomic form to ensure maximum comfort, naturally varnished through the application of non-toxic water-based paints. The seat and backrest are fixed to the metal structure using eight high-strength rivets, four for the back and four for the seat. The chair is equipped with non-removable, noise-reducing and non-slip rubber feet which, even if dragged, do not leave any **trace on the floor**.

Technical features:

- Beech seat
- aluminum structure
- Seat dimensions: 28x28 cm.
- Seat height: 31 cm
- Size 2
