

Primary and secondary school chair h177_61

School chair for primary and secondary school in self-extinguishing polypropylene and chrome-plated steel. Seat height 34 cm, stackable and Class 1 certified.

The **H177_61 primary and secondary school chair** is a technical furnishing solution designed to ensure high standards of durability, safety, and comfort within educational contexts. The seat is made of **high-quality copolymer polypropylene**, a material selected for its resistance to wear and ease of maintenance. Compliance with **Class 1 self-extinguishing** certification makes it suitable for use in public environments subject to stringent fire regulations.

The structural base consists of an **18 mm diameter chrome-plated tube**, electro-welded and cold-formed to ensure maximum mechanical stability. The seat surface features **non-slip embossing** that improves grip and postural comfort for the student during lesson hours. The design includes a functional hole in the backrest to facilitate manual handling and a structure designed for **stackability**, optimizing logistical flows and storage.

Technical features

- **Seat material:** high-quality copolymer polypropylene, mass-colored with high-fastness pigments
- **Supporting structure:** Ø 18 mm chrome-plated steel tube, electro-welded and cold-formed
- **Fire certification:** Class 1 self-extinguishing (Italian regulation)
- **Total height:** 81 cm
- **Seat height:** 34 cm
- **Overall width:** 37 cm
- **Overall depth:** 39 cm
- **Surface finish:** technical non-slip embossing
- **Fixing systems:** 4 self-tapping screws for permanent stability
- **Configuration:** stackable chair with grip hole in the backrest
- **Aesthetic options:** various colors available for environmental chromatic integration
