

## Primary and secondary school chair monocoque h908\_222

Size 6 school chair with polypropylene monocoque and Ø25 mm steel structure. Ergonomic, stackable and ideal for students from 11 years old.

The **primary and secondary school chair H908\_222** has been developed to meet the needs for robustness and correct posture in high-traffic educational environments. The combination of a high-resistance **polypropylene monocoque** and a **25 mm tubular steel** frame guarantees a durable furnishing solution, capable of withstanding the daily stresses typical of school classrooms.

The design focuses on the student's well-being: the backrest offers **ergonomic lumbar support**, fundamental for maintaining concentration during prolonged use. The presence of the **rear hole** is not just an aesthetic detail, but a functional element that facilitates the grip and movement of the chair, easing the reconfiguration of educational spaces or tidying operations.

## Technical features

- **Structure:** 4 legs in tubular steel with Ø25 mm diameter
- **Seat and backrest:** Ergonomic monocoque in resistant polypropylene
- **Handling:** Integrated rear hole for a quick grip
- **Storage:** Stackable model for space optimization
- **Dimensions:** W 42 cm x D 46 cm x Seat H 46 cm
- **Size:** 6 (school regulations)
- **Intended use:** Indoor environments, classrooms, laboratories and libraries
- **Maintenance:** Smooth and water-repellent surface, easy to sanitize
- **Customization:** Available in different color variants
- **Configuration:** Product supplied already assembled
