

Primary school desk for students h908_77

Single-seater school desk in steel with ergonomic C-shaped structure, 70x50x64 cm top and sheet metal under-shelf. Ideal for stability and hygiene in the classroom.

The **H908_77 model** single-seater school desk represents an advanced technical solution for furnishing modern classrooms. Its **"C" structure**, made of tubular steel with **40 mm diameter** legs, is designed to offer superior stability compared to traditional models, while ensuring easy access to the seat and ample space for leg movement. The integration of a **sheet metal under-shelf** allows for optimal management of teaching materials, keeping the work surface free of clutter.

The ivory finish worktop is selected for its resistance to mechanical wear, scratches, and stains, facilitating the daily sanitizing operations necessary in high-frequency school environments. The choice of materials and the tubular section ensure long operational life, countering the structural deformation phenomena typical of intensive use.

Technical characteristics

- **Type:** Single-seater desk for school and training use
- **Structure:** Painted steel "C" frame with Ø 40 mm legs
- **Worktop:** Ivory color scratch-resistant surface
- **Under-shelf:** High-resistance sheet metal storage compartment
- **Dimensions:** 700 x 500 x 640 mm (W x D x H)
- **Frame finish:** Aluminum color industrial painting
- **Intended use:** Secondary schools, high schools, universities
