

Privacy screen for medical practices h930_18

2-section screen in metal and panels, 134x48x165 cm. Robust structure, easy to sanitize. Ideal for clinics and hospitals.

The screen is a structural solution for healthcare environments that need to ensure **patient privacy** in a practical and effective way. The two-section configuration allows for flexible positioning in clinics, outpatient surgeries, and hospitals, creating isolated spaces without masonry work. The metal and panel structure has been designed for **long-lasting durability** and ease of hygienic maintenance, essential features in medical contexts.

Technical features

- Number of sections: 2
- Total length: 134 cm
- Depth: 48 cm
- Height: 165 cm
- Frame material: metal
- Panel material: removable panels
