

Professional Bobath therapy table h725_07

Bobath and Vojta rehabilitation bed in metal, 200x200 cm. Electric adjustment, IM1 fire-retardant upholstery and 300 kg safety load capacity.

This **professional medical table** is specifically designed for performing **Bobath and Vojta** rehabilitation methods, which require large work surfaces and superior structural stability. The device meets the operational needs of rehabilitation centers and physiotherapy clinics, offering a safe platform for patients with complex motor disabilities and for the simultaneous work of the therapist and patient on the support surface.

The metal load-bearing structure guarantees maximum solidity during therapeutic maneuvers, while the electric movement system allows for fluid height adjustment, facilitating both patient access and health operator ergonomics.
