

Professional boot dryer 20 places h1034_09

Professional vertical boot dryer for 20 pairs, in stainless steel with timer. Dimensions: W 116 x D 48 x H 200 cm.

The **H1034_09** model is a **professional wall-mounted electric boot dryer**, designed for the simultaneous drying of **up to 20 pairs of shoes or boots**, ideal for facilities with high traffic such as **mountain hotels, alpine huts, ski centers, barracks** and **fire departments**.

Built **entirely of stainless steel**, it guarantees **maximum corrosion resistance, durability** and **impeccable hygiene**, even in environments subject to high humidity or continuous use.

The system is **ready for use**, equipped with a **230V plug already installed** and an **integrated 24h timer**, which allows for simple and precise programming to best manage drying times and optimize consumption.

With a **total energy consumption of 340W** (equal to **17W per pair of shoes**), this panel is an **ecological and highly efficient solution**, capable of offering professional performance with low energy impact.

The **continuously bent rounded brackets**, in addition to ensuring **optimal hot air circulation**, prevent lateral or downward tilting of the footwear, ensuring **uniform drying right to the toe**. The design is also suitable for **children's shoes and gloves**, making the H1034_09 model extremely **versatile**.

Developed with **over 30 years of experience** and covered by a **10-year total warranty**, this boot dryer represents a safe and lasting choice for those seeking **maximum reliability in professional environments**.

FAQ:

1. **Is the product already ready to be used?**

Yes, the H1034_09 arrives ready for use, with a 230V plug already installed and timer included.

2. **Is it suitable for high humidity environments?**

Yes, the stainless steel structure makes it ideal for humid environments such as ski rooms, boot storage, barracks and ski centers.

3. **Is the energy consumption high for 20 pairs?**

No, it is extremely efficient: only 17W per pair, for a total of 340W at full load.

4. **Is it possible to use it also for children's shoes and gloves?**

Yes, the rounded bracket structure is perfectly compatible with small footwear and gloves.

5. **What warranty does the product offer?**

The panel is covered by a 10-year total warranty, including structure and operation.

Mini buying guide:

For professional environments with a high flow of users and the need for rapid and hygienic drying, it is essential to choose a boot dryer with **high capacity, ready to use**, with **low energy consumption** and **durable materials**. The H1034_09 fully meets these needs: it is built in **stainless steel**, equipped with an **integrated timer, zero maintenance** and ensures continuous and efficient service even in the most difficult conditions. An investment that improves guest comfort and the operational management of the facility.
