

Professional boot dryer h1034_05

Professional horizontal boot dryer for 5 pairs, in stainless steel with timer. Dimensions: W 69 x D 48 x H 89 cm.

The **H1034_05** model is a **professional horizontal electric boot dryer** designed for the fast, safe, and uniform drying of **up to 5 pairs of boots**, ideal for **hotels in mountain areas, ski centers, alpine huts, barracks, and fire departments**. Thanks to its **compact horizontal design**, it is perfect for limited spaces such as ski-rooms, locker rooms, or technical areas.

Built **entirely of stainless steel**, it is designed to withstand time even in high-humidity environments, maintaining high standards of **hygiene, durability, and safety**.

The system is equipped with an **integrated 24h timer, ready-to-use power plug**, and operates with a minimum energy consumption of **85W (17W per pair of shoes)**, making it extremely **eco-friendly and efficient**.

The **rounded brackets** bent in a continuous way guarantee **perfect stability** of the footwear during drying, preventing lateral or downward tilting. The warm air generated inside the shoe **risers naturally**, eliminating moisture even in the most difficult-to-reach areas such as the toes.

Thanks to its **versatility**, the model is also suitable for **gloves and children's shoes**. It requires no maintenance and is covered by a **total 10-year warranty**, a testament to the quality and reliability of a product developed with **over 30 years of experience** in the industry.

Bring quality and practicality to your facility with the **H1034_05 horizontal boot dryer**! Contact us for a personalized quote and discover tailor-made solutions for hotels, barracks, and ski centers.

FAQ:

1. **Is professional installation required?**
No, the product arrives ready to use with a plug: just connect it to the socket.
2. **Is it possible to adjust drying times?**
Yes, it is equipped with an integrated 24h timer for programming the drying.

3. **Does the system also work for gloves or children's shoes?**

Yes, the design of the brackets makes it versatile and suitable even for small footwear and gloves.

4. **Is a heated environment necessary for correct operation?**

Yes, the ambient temperature must be at least 15°C to ensure optimal performance.

5. **What warranty does the product offer?**

The H1034_05 model is covered by a total 10-year warranty, which includes structure and functionality.

Mini buying guide:

If you are looking for a compact, safe, and efficient boot dryer, an **electric model with a timer** is the perfect choice for hotels, barracks, or ski areas requiring **fast and controlled drying**. Always check the **absorbed power** and **ease of use**: a plug & play system like the H1034_05 reduces installation time and is immediately operational. Opt for **stainless steel** models to guarantee **hygiene, durability, and resistance to humidity**.
