

Professional boot dryer h1034_07

Professional vertical boot dryer for 10 pairs, in stainless steel. Dimensions: W 61 x D 48 x H 200 cm.

The **professional boot dryer H1034_07** is a **vertical electric shoe dryer panel** designed for the simultaneous drying of **up to 10 pairs of boots or shoes**, ideal for facilities such as **hotels in mountain areas, mountain huts, ski centers, barracks** and **fire stations**.

Thanks to its **entirely stainless steel structure**, the product ensures **durability, hygiene and resistance to humidity**, even in environments for intensive and continuous use.

The system is equipped with a **230V power plug** ready for use and an **integrated 24h timer**, which allows you to program the drying in a convenient and safe way. With a **minimum energy consumption of 170W total (equal to 17W per pair of shoes)**, it proves to be an **ecological and efficient** choice, reducing the impact on consumption even in case of daily use.

The **rounded brackets**, continuously bent, guarantee stable housing for the footwear, avoiding lateral or downward tilting, and allow for **natural circulation of the warm air** that rises into the shoe to dry the tip. The design also allows for the drying of **children's shoes and gloves**, making the product extremely **versatile**.

Completely **maintenance-free**, the H1034_07 is delivered ready for use, with **over 30 years of experience** behind it and a **10-year total warranty**, synonymous with quality and reliability over time.

Offer your guests or operators always dry and comfortable footwear with the **H1034_07 shoe dryer**! Contact us now to receive a customized offer for your facility and take advantage of the 10-year total warranty.

Technical features:

FAQ:

1. **Does the product arrive ready to be used?**

Yes, the H1034_07 is delivered complete with plug and timer, ready for use without the need for complex installations.

2. **Is it safe to use in humid environments like ski-rooms or barracks?**

Absolutely yes, the stainless steel structure makes it ideal for environments subject to constant humidity.

3. **Can I also use it for gloves or children's shoes?**

Yes, the rounded brackets adapt perfectly even to smaller footwear or gloves.

4. **Does it need a minimum ambient temperature to work well?**

Yes, an ambient temperature of at least 15°C is recommended to ensure the efficiency of the system.

5. **How long does the warranty last?**

The product is covered by a total 10-year warranty, including structure and operation.

Mini buying guide:

When choosing an electric boot dryer for a professional environment, consider the **capacity**, the **type of power supply** and the **energy efficiency**. The model H1034_07 combines a **robust stainless steel structure**, reduced consumption and **absolute ease of use** thanks to the integrated timer and the plug already installed. It is ideal for those who need a **reliable, safe and durable** solution that requires **zero maintenance** and offers **high performance** over time.
