

Professional boot washer machine h762_01

Professional boot washer machine in stainless steel and aluminum, 650x530x905 mm. 7-brush system and nozzles for intensive industrial hygiene.

The **professional boot washer machine** is a technical solution designed to guarantee the highest standards of hygiene in critical operational contexts. Thanks to its robust structure, it effectively prevents **cross-contamination** and the spread of dangerous or polluting substances between different work areas. The system combines the mechanical action of specialized brushes with a targeted water jet, solving the problem of quick and deep cleaning of technical footwear in environments with high frequency of use.

Technical features

- **External dimensions:** 650 mm (length) x 530 mm (width) x 905 mm (height)
- **Operating weight:** 32.5 kg
- **Construction materials:** bottom basin in **stainless steel** and housing in **powder-coated aluminum**
- **Brushing system:** 7 groups of high-quality brushes, including one specific for the sole area
- **Water configuration:** integrated system with side and bottom nozzles with splash guard coating
- **Manual control:** independent activation of the upper nozzles for cleaning low or high shaft boots
- **Mobility:** equipped with 2 ergonomic handles and 2 wheels for easy repositioning
- **Waste management:** centralized drain for water and solid residues via standard connection for flexible hoses

For optimal cleaning, the operator must perform back and forth movements along the brush groups to activate the mechanical and hydraulic cleaning effect.
