

## Professional cleaning trolley h422\_101

Professional polypropylene cleaning trolley, 98x68x111 cm, with flat wringer and differentiated buckets. Ergonomic latex-free structure.

The **h422\_101** professional cleaning trolley is designed to ensure maximum efficiency and hygiene in high-traffic environments requiring rigorous sanitary standards. The **copolymer polypropylene** frame ensures superior resistance to impact and chemical corrosion, while maintaining a lightweight and ergonomic profile for the operator. The absence of latex in the components makes it a safe and suitable solution for clinical and hospital contexts, preventing potential allergic reactions in sensitive environments.

## Technical features

- **Material:** High-density copolymer polypropylene
- **Washing configuration:** Two 15-litre bucket system for water separation
- **Upper equipment:** Two 4-litre service buckets for surface cleaning
- **Wringing system:** Professional flat wringer for flat and traditional mops
- **Waste management:** Integrated bag holder with ergonomic push handle
- **Dimensions:** W. 98 x D. 68 x H. 111 cm
- **Safety:** Product entirely latex-free
