

Professional cleaning trolley h422_95

Professional polypropylene cleaning trolley, 97x68x111 cm, with flat wringer and color-coded buckets for hotels and healthcare environments.

The **h422_95** cleaning trolley is a complete operating station designed for professional hygiene in environments requiring high standards, such as hotel facilities and hospital complexes. The load-bearing structure in **polypropylene copolymer** ensures high resistance to impacts and mechanical stress, keeping the trolley lightweight and easily maneuverable thanks to the push handle integrated into the bag holder.

The washing system is optimized by the presence of two 15-liter main buckets and 4-liter auxiliary buckets, color-coded to allow for correct separation of detergent solutions and prevent cross-contamination. The distinctive element is the **flat wringer**, ideal for ensuring uniform pressure on textile fibers and efficient mop moisture management.

Technical specifications

- Material: high-resistance polypropylene copolymer
- Integrated bag holder with ergonomic handle
- Washing system: 2 x 15-liter buckets
- Auxiliary equipment: 4-liter buckets with color coding
- Wringing mechanism: professional flat wringer
- Overall dimensions: W. 97 x D. 68 x H. 111 cm
- Safety: completely latex-free product
