

Professional cleaning trolley h422_97

Professional polypropylene cleaning trolley h422_97, with 4 buckets, flat wringer and bag holder. Ideal for healthcare environments and hotels.

The professional cleaning trolley **h422_97** is a complete workstation designed to meet sanitization needs in high-traffic professional contexts. Made of **polypropylene copolymer**, the frame ensures high impact resistance and superior stability, while maintaining an ergonomic profile for easy movement. The structure is entirely **latex-free**, a feature that makes it suitable for use in hospital wards and nursing homes, preventing the risk of allergic reactions for operators and patients.

Technical features

- **Material:** High-density polypropylene copolymer
- **Washing system:** Professional flat wringer for effective liquid removal
- **Bucket configuration:** Two 15-litre buckets for main washing and two 12-litre buckets with colour coding for differentiated solutions
- **Waste management:** Integrated bag holder with ergonomic push handle
- **Storage:** Central storage tray for chemical products and equipment
- **Dimensions:** W. 133 x D. 68 x h. 120 cm
- **Safety:** "Latex Free" certification
