

Professional conveyor toaster h83318

Conveyor toaster for 150 slices/hour, with adjustable speed and heat. Dimensions: W 32 x D 65 x H 42 cm.

The **H83318 professional conveyor toaster** is the ideal solution for **Ho.Re.Ca.** businesses that require **high performance and continuity** in breakfast and catering services. Thanks to its **integrated conveyor belt**, it is capable of **toasting up to 150 slices of bread per hour**, making it perfect for hotels, canteens, self-service areas, cafes, and sandwich shops.

Built in **durable stainless steel**, it is designed to guarantee **durability, hygiene, and ease of cleaning**. Its compact dimensions make it suitable for installation on counters or work tables.

The machine is equipped with **two rotating knobs**: one to select the heating mode (top only, top and bottom, or bun/roll mode) and one to **adjust the belt speed between 1 and 9 revolutions per minute**, allowing you to achieve the desired level of browning. It is also possible to **reverse the transit direction**, adapting to the kitchen layout.

The **indicator lights** signal the power status (green) and heating status (red), ensuring safe and controlled use. The **removable crumb tray** facilitates maintenance, while the **slide plate and rear cover** optimize line use.

Perfect for **bread, focaccia, buns, and rolls**, it is a versatile device designed for intensive and continuous use.

Order the **H83318 conveyor toaster** now and improve the efficiency of your breakfast or self-service. Request a quote for multiple supplies or discover other available models!

FAQ:

1. **How many slices can it toast per hour?**

Up to 150 slices of bread per hour, depending on the type of bread and settings.

2. **Can I use the toaster for buns or rolls too?**

Yes, it is also suitable for rolls, focaccias, and buns thanks to its dedicated settings.

3. **Can I choose the type of toasting?**

Certainly, you can set top heat only, top + bottom, or bun mode, and adjust the belt speed.

4. **Is it easy to clean?**

Yes, it is equipped with a removable crumb tray and stainless steel surfaces that are easily washable with a damp cloth.

5. **Can it be used in self-service or buffets?**

Yes, it is perfect for breakfast buffets, canteens, and hotels due to its simple operation and compact design.

Mini buying guide:

If your venue serves **breakfast in large volumes** or requires a continuous and fast flow in **bread toasting**, a **conveyor toaster** is the ideal choice. The H83318 model, compact yet powerful, is designed to handle **up to 150 slices/hour** with total control over speed and heating modes.

Consider the **belt width (17 cm)** based on the types of bread used. The **stainless steel design**, combined with **ease of cleaning** and **speed and heat adjustment**, makes this model perfect for professional kitchens, self-service buffets, and hotels with high quality standards.

Professional conveyor toaster, hotel breakfast toaster, self-service buffet toaster, bun and roll toaster, conveyor belt toaster, high capacity stainless steel toaster.
