## Professional cycle ergometer h731\_90

Advanced upright cycle ergometer for professional rehabilitation, equipped with a multicolor backlit LCD display, bio-feedback function, preset programs and resistance from 25 to 300 W. Dimensions: L 100 x D 65 x H 145 cm.

The **H731\_90 professional ergometer** is a high-precision instrument designed to guarantee **maximum performance in medical and rehabilitation settings**. Thanks to its advanced technology, it offers a complete and controlled training experience, with a **bio-feedback function**, **advanced control unit**, and **adjustable resistance** from 25 to 300 watts.

This cycle ergometer stands out for its **operation independent of the power grid**, making it practical and easy to position in any environment without the need for a mains connection. The **multicolor backlit LCD display** visualizes **8 fundamental parameters** in real time, accompanied by a graphic representation of the exercise, to monitor every aspect of physical activity.

**Easy access** ensures comfortable mounting and dismounting, particularly useful for users with reduced motor skills. The **saddle adjustable in height and depth** allows you to customize the training position for maximum comfort and correct posture. The **single belt drive system** ensures smooth and silent pedaling.

Among the **preset programs**, the **Quick Start**, the **Watt program** for power control, and the **pulse-based program** stand out, allowing you to train safely while keeping your heart rate under control. The **integrated receiver** is compatible with heart rate chest straps for precise pulse measurement.

The cycle ergometer complies with the **DIN EN ISO 20957-1/5 S-A-I**, **DIN EN 60601-1**, and **93/42/EEC** standards, a synonym for quality and safety.

**Improve your rehabilitation experience with the H731\_90 professional ergometer! Buy now or contact us for further information.**

### Technical characteristics:

- **Resistance:** 25-300 W, 20-120 rpm
- **Drive system:** Single belt
- **Programs:** Quick Start, Watt, Pulse
- **Display:** Multicolor backlit LCD, 8 displayable parameters
- **Integrated pulse receiver:** Yes
- **Chipcard system:** Yes
- **Saddle:** Depth and height adjustable
- **Access:** Easy
- **Feet:** Adjustable
- **Dimensions:** L 100 x D 65 x H 145 cm
- **Weight:** 64 kg
- **Maximum capacity:** 130 kg
- **Compliance:** DIN EN ISO 20957-1/5 S-A-I, DIN EN 60601-1, 93/42/EEC

## User benefits:

- **Excellent:** for professional rehabilitation.
- **Advanced exercise monitoring:** with bio-feedback and graphic representation.
- **Customizable programs:** for precise power and pulse control.
- **Easy access:** ideal for users with reduced mobility.
- **Adjustable saddle:** for correct and comfortable posture.
- **Belt drive:** for smooth and silent pedaling.

## FAQ:

1. **Is the exercise bike equipped with a display?**  
Yes, the cycle ergometer is equipped with an LCD display.
2. **What is the maximum capacity of the exercise bike?**  
The maximum capacity of the exercise bike is 130 kg.
3. **Does the cycle ergometer work without a power grid?**  
Yes, operation is completely independent of the power grid.
4. **How many training programs are available?**  
There are 3 main programs available: Quick Start, Watt and Pulse.
5. **Does it comply with medical standards?**  
Yes, it complies with DIN EN 60601-1 and 93/42/EEC standards.

## Mini buying guide:

The **H731\_90 ergometer** is designed for those seeking a highly professional tool for **rehabilitation and controlled training** in the medical field. Thanks to its **bio-feedback function** and **advanced programs**, it offers a complete experience for muscle and cardio-respiratory recovery.

**Easy access**, the **advanced LCD display** and the possibility to customize the exercise based on precise parameters make it ideal for medical centers, physiotherapy clinics and healthcare facilities. The **smooth and silent pedaling**, combined with continuous pulse monitoring, ensures maximum safety and comfort.
