

Professional ergometer h731_92

Professional ergometer with magnetic induction braking system, customized programs for beginners and athletes, and advanced training computer. Dimensions: L 103 x W 56 x H 137 cm. Maximum capacity: 150 kg.

The **professional ergometer H731_92** is designed to ensure **high performance** during intensive training and rehabilitation programs. Thanks to the **magnetic induction braking system** and the **14 kg flywheel mass**, it offers smooth and precise pedaling, ideal for those seeking a reliable and durable tool.

The **integrated training computer** allows you to view the main training parameters, such as **distance, time, calories, speed, pulse, RPM, and watts**, offering a complete overview of the physical activity in progress. Among the **preset programs**, there are **1 manual, 4 for beginners, 4 advanced, 4 for athletes, 4 cardio, and 1 Watt**, in addition to the **bodyfat test**, for comprehensive monitoring of body composition.

The **vertically and horizontally adjustable saddle** and the **tilting handlebar** allow for maximum customization of the training position, ensuring optimal comfort for every user. The ergometer is equipped with **heart rate detection via hand sensors**, to constantly monitor the heart rate and ensure a safe workout.

The solid structure, combined with **transport wheels**, makes it easy to move and position the equipment. **EN957 - 5 HA certified**, the H731_92 complies with European safety and quality standards, representing an ideal choice for gyms, rehabilitation centers, and intensive home use.

**Choose the professional cycle ergometer H731_92 for a complete and safe training experience!

Technical features:

- **Braking system:** Magnetic induction
- **Flywheel mass:** 14 kg
- **Transmission ratio:** 1:32
- **Programs:** 1 manual, 4 beginner, 4 advanced, 4 athlete, 4 cardio, 1 Watt, bodyfat test
- **Saddle adjustment:** Vertical and horizontal
- **Heart rate detection:** Hand pulse
- **Transport wheels:** Yes
- **Dimensions:** L 103 x W 56 x H 137 cm
- **Weight:** 37 kg
- **Maximum capacity:** 150 kg
- **Certification:** EN957 - 5 HA
- **Power supply:** 240 VAC - 50 Hz

User benefits:

- **Wide variety of programs:** to adapt to all training levels.
- **Personalized saddle and handlebar adjustment:** for optimal comfort.
- **Magnetic induction braking system:** precise and silent.
- **Complete monitoring of training parameters:** for total performance control.
- **Quality and safety certification:** according to European standards.

FAQ:

1. Which parameters does the display show?

The display shows distance, time, calories, pulse, speed, watts, RPM, and recovery.

2. Is it possible to adjust the saddle?

Yes, the saddle is adjustable both vertically and horizontally to ensure the optimal position.

3. Is the braking system silent?

Yes, the magnetic induction system ensures smooth and silent pedaling.

4. What training programs are available?

Programs for beginners, advanced users, athletes, and cardio are available, as well as the bodyfat test.

5. What is the maximum capacity of the equipment?

The maximum capacity is 150 kg.

Mini buying guide:

The **H731_92 ergometer** is ideal for those looking for a professional tool for **personalized training** and **advanced performance monitoring**. Thanks to the numerous training programs and the **magnetic induction resistance**, it adapts to both beginners and expert users. The adjustment of the saddle and handlebar allows for an ergonomic position, improving comfort and reducing the risk of injury.

If you are looking for a **reliable ergometer** that complies with European safety standards, the H731_92 is the perfect solution for **intensive training and professional rehabilitation**.

Professional ergometer, H731_92, rehabilitation cycle ergometer, intensive training, bodyfat test, cardio training.
