

Professional evaporative cooler 130 lt h923_10

Portable evaporative cooler h923_10 with 130 L tank. Airflow 12,500 m³/h, power 400 W, UV lamp and three speeds. Suitable for outdoor and indoor use.

The **professional evaporative cooler 130 lt h923_10** is a high-efficiency portable device designed to cool the air by exploiting the natural evaporation of water. Developed for **industrial operators, employers, company safety managers, workshop technicians and managers of craft or commercial activities**, this system responds to the need to air-condition large volumes in an ecological and economical way. The module solves the operational problem of **cooling and purifying the air in outdoor environments and in internal spaces that cannot be delimited by doors, guaranteeing greater air recirculation and providing for the removal of fumes, odors and heat produced by running machines**. The operating principle involves water being slid through a panel and the hot air, passing through the water, gives up its heat and cools down. The unit includes a germicidal UV lamp for water sanitization, a large 130-liter tank and easily removable and washable cellulose evaporative panels, housed in a UV and corrosion-resistant frame. Thanks to the plug and play system with Schuko connection, installation takes only a few minutes and the unit is immediately ready for use.

Technical features

- **Model/Type:** professional portable evaporative cooler
- **Code reference:** h923_10
- **Volumetric air flow:** 12,500 m³/h
- **Water sanitization:** germicidal UV lamp (YES)
- **Nominal power supply:** 220 V / 50 Hz
- **Electrical connection type:** SCHUKO (Plug and play configuration)
- **Motor power:** 400 W
- **Ventilation adjustment:** 3 fan speeds
- **Water tank capacity:** 130 L
- **Automatic water supply:** direct water connection (YES) for hose with automatic filling
- **Internal water monitoring:** water level control (YES)
- **Structural overall dimensions (W x D x H):** 945 x 660 x 1500 mm
- **Net structural mass (Weight):** 41 Kg
- **User interface:** control panel available
- **External frame features:** UV and corrosion resistant for greater durability and sustainability
- **Internal evaporative components:** cellulose panels, easily removable and washable
- **Air filtration system:** washable air filter
- **Pump safety devices:** automatic shutdown for lack of water to protect the lift pump
- **Electrical reset systems:** automatic restart after a power failure
- **Energy efficiency:** high cooling capacity with very low energetic and economic consumption
