

Professional fall arrest work harness h1053_04

Professional fall arrest harness h1053_04 with side rings, quick release and 170 mm padding. Comfort and safety for work at height.

The **h1053_04 professional fall arrest work harness** is an advanced Personal Protective Equipment, designed to ensure maximum safety and correct postural support for operators during interventions at height and in suspension. Aimed at construction professionals, maintenance workers, installers and technicians specialized in rope work, this PPE solves the problem of physical fatigue related to the prolonged use of fall arrest systems. The integration of fabric padding on the legs and a wide 170 mm back section prevents crushing and improves circulation, while the combination of lateral retention rings and climbing protection eyelets offers total versatility in positioning maneuvers. Equipped with adjustable straps and a quick-release system, it adapts instantly to different body sizes to optimize operating times.
